# Model 75 Drill

Main Section

Extra Section

## APE Model 75 Drill

Please note the extra section. You can tell the difference between the APE Model 50 and Model 75 by noting that the Model 75 has an extra section that makes the motor a couple of inches taller. This extra section adds ten pistons to the standard APE Model 50 motor.

Poclain MS125  
Model 75 Drill  
Motor

THARCO

The Model 75 drill is taller than the Model 50 drill. Otherwise, there is no difference in outside dimensions.

# Model 50 Drill

The Model 50 drill measures 14 ¼ inches while the APE Model 75 measures 17 inches tall.
