#16 REV.A New Clamp Pressure Switch 4/24/15

This bulletin is to provide information on the new pressure switch. We have decided to use this switch because of its quality and accuracy. One other benefit from this switch is a drastically reduced dead band compared to our previous switch.

They will be set in the same method as the other switch was. (See **Service Bulletin #12**) The switch will need to be installed upside down to prevent moisture getting inside it. (See IMG.1) To adjust this switch remove the cover screw with a 5/32" allen wrench. (See IMG. 2). Then use a 1/8" allen wrench to adjust to proper setting. (See IMG.3) When the adjustment is completed reinstall cover screw. We also suggest putting a dollop of Dottie Seal Compound on the cover screw when finished. Dottie can be purchased at any electrical supplier. (See IMG. 4)

IMG.4

If an old style pressure switch fails this switch should replace it. The most important use for it is in our rental fleet. This will save a lot of money in replacement costs once installed. If a customer asks for a switch it would be a great up sale to give them a better A.P.E. product.

The first two items below are what is needed to make this retro fit.

- | | | |
|------------|----------------------------|--|
| 1. 1001914 | Pressure Switch Assembly | This includes the turn block assembly. |
| 2. 1002086 | Cord SO-f Deutsch Pin-120" | This is for the pressure switch no L.E.D |
| 3. 1002431 | Pressure Switch | This is just the pressure switch. |
